PUBLIC NOTICE: Water Main Replacement Project – Nyborg Estates

The City of Solvang is pleased to provide an update on the Water Main Replacement Project in the Nyborg Estates neighborhood. Construction began on July 21, 2025, and is progressing efficiently and on schedule. To date, the contractor has completed 30% of the waterline replacement and continues to make steady progress through the neighborhood with minimal issues or disruption to water service.

The project commenced on July 21, 2025, and is anticipated to be completed by February 25, 2026.

Responsible Investment in Our Water System

This \$2.4 million project represents a significant investment in the community's water infrastructure. The City is committed to using ratepayer funds in a fiscally responsible manner to complete this and other utility improvements. By proactively replacing aging infrastructure, we are reducing costly emergency repairs, improving system reliability, and ensuring high-quality service for residents and businesses.

Transparency and Community Input

The City of Solvang strives to maintain transparency in the management of all utility projects. Updates such as this are part of our effort to keep the community informed about how your water rates are being invested. We welcome public input, which can be shared at City Council meetings or directly with City staff. Feedback, concerns, or positive comments are encouraged and appreciated.

Project Progress

Photos on the following page highlight progress being made in the neighborhood and showcase the crews' efforts in completing this important project.

If you have any questions, concerns, or would like to learn more, we encourage you to reach out to one of the contacts below. We are here to support you and respond to any inquiries you may have throughout construction.
